NASDAQ SUSTAINABLE BOND NETWORK

Green bond issuance has grown substantially since the first green bonds were issued in 2007, as investors seek opportunities to fund environmental and climate-related projects. The Nasdaq Sustainable Bond Network (NSBN) provides investors with detailed information on sustainable, green and social bonds for investment due diligence, selection and monitoring.

NSBN displays all data, qualitative information and documents submitted by issuers on an open-to-all website and disseminates the information in a machine-readable format through proprietary market data feeds. Our ambition is to bring transparency to the global sustainable bonds market, equipping both product issuers and investors with the information they need to make data-driven decisions to help advance organizations looking to take on green initiatives.

The network is a natural expansion of our existing Sustainable Bonds Market launched in 2015, which today lists more than 200 green bonds.

Why join
- Showcase your bonds, and aggregate all related documents and data in a centralized, public platform
- Inform investors and other stakeholders of your sustainable bonds via machine-readable data
- Amplify your adherence to sustainability standards on a global platform
- Connect and compare sustainable bonds across regions

How to join
Sustainable bond(s) issuers can join the Nasdaq Sustainable Bond Network by submitting an application to nsbn@nasdaq.com.
The application should include the following:
- Your latest Sustainable/Green/Social Bond Framework
- An external review (in writing) that attests to your conformity with the standards you issue under

Once you submit an application and it is determined that you fulfill the inclusion criteria, Nasdaq will publish your sustainable bonds and all related data and documents on the platform.

Supported data
- Key Sustainable Bond Documents - Framework, External Review, Assurance Reports and Allocation/Impact Reports
- Project Categories
- Project Category Allocation
- Impact Metrics, based on the Nordic Public Sector Position Paper
- Ad-hoc publishing of other relevant documentation
- Free text information on security and issuer level
**Fees**

Issuers who solely use the base functionality of publishing data on the NSBN are not subject to any fees.

**DISCLAIMERS:** The Nasdaq Sustainable Bond Network (NSBN) is an informational service that describes bonds that purport to meet certain sustainability criteria as described on the NSBN website. The NSBN is not a part of The Nasdaq Stock Market LLC ("Nasdaq") or its affiliated exchanges, and bonds included on the NSBN might not be listed on Nasdaq or any other national securities exchange. These criteria for inclusion in the NSBN are not listing requirements nor are they approved by the SEC. A decision to include or exclude a bond from the NSBN reflects only a determination by Nasdaq that the bond satisfies or fails to satisfy the criteria for inclusion on the NSBN; such a decision should not be interpreted as a determination by Nasdaq that a bond satisfies or fails to satisfy any underlying sustainability criteria. Bond issuers are responsible for determining for themselves whether publication of information about a bond on the NSBN is permissible under the laws and regulations of their applicable jurisdictions. Issuers should consult legal counsel to determine not only the permissibility of publishing information on the NSBN, but also the legal risks and consequences of doing so. Information about the NSBN and the inclusion of a security in the NSBN should not be construed as investment advice, either on behalf of a particular security or an overall investment strategy. Neither Nasdaq, Inc. nor any of its affiliates makes any recommendation to buy or sell any security or any representation about the financial condition of any company. Actual results may differ materially from those expressed or implied. Past performance is not indicative of future results. Nasdaq does not represent or warrant that any of the bonds displayed in the NSBN are suitable for or legally available for investment in any particular jurisdiction. Investors should undertake their own due diligence and carefully evaluate companies and applicable laws before investing. ADVICE FROM A SECURITIES PROFESSIONAL IS STRONGLY ADVISED.
