## 1. DEFINITIONS

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Contributor</td>
<td>Parties contributing input data.</td>
</tr>
<tr>
<td>Customer</td>
<td>The Customer is the natural and/or legal person who signs the market data license agreement with Nasdaq, and is invoiced for the market data fees.</td>
</tr>
<tr>
<td>Data Feed</td>
<td>Any uncontrolled transmission of Nasdaq Information in which the Customer does not control both the entitlements and the display of the Information.</td>
</tr>
<tr>
<td>Data Feed Recipient</td>
<td>Shall mean any Recipient outside of Distributor that (i) receives Nasdaq Information from the Distributor and (ii) for which the Distributor cannot substantially control Nasdaq Information for the purpose of reporting usage or qualification</td>
</tr>
<tr>
<td>Display Data</td>
<td>Market Data provided or used through the support of a monitor or a screen and that is human readable.</td>
</tr>
<tr>
<td>Distributor</td>
<td>A Customer licensed for distribution of data.</td>
</tr>
<tr>
<td>Delayed</td>
<td>A period of time after which Information becomes Delayed Information, by default 15 minutes.</td>
</tr>
<tr>
<td>End-of-Day</td>
<td>Information which is available for use after official market close.</td>
</tr>
<tr>
<td>External</td>
<td>Distribution of Nasdaq Information outside of the Customer's entity as defined by the GDA.</td>
</tr>
<tr>
<td>Indirect Access</td>
<td>Any method of accessing Exchange Information other than Direct Access.</td>
</tr>
</tbody>
</table>
| Information or Data   | Any data or information that has been collected, validated, processed and/or recorded by Nasdaq and made available for transmission relating to: (i) eligible securities or other financial instruments, markets, products, vehicles, indicators or devices; (ii) activities of the Exchange; or (iii) other information or data from Nasdaq. Information includes, but is not limited to, any element of information used or processed in such a way that Exchange Information or a
substitute for such Information can be identified, recalculated or re-engineered from the processed information.

| **Market Data** | The data Nasdaq has to make public for the purpose of the pre-trade and post-trade transparency regime. Therefore, market data includes the details set out in MiFIDII Annex I of RTS 1 and Annex I and Annex II of RTS 2. |
| **Non-Display Data** | Market data which does not meet the definition of Display Data. |
| **Non-Professional Customer** | Non-Professional Customer mean a customer who does not meet the definition of Professional Customer. |
| **Post-trade Data** | Trade data available after a specific trade is complete. |
| **Pre-trade Data** | Order data available before a trade is complete. |
| **Professional Customer** | A customer who uses market data to carry out a regulated financial service or regulated financial activity or to provide a service for third parties, or who is considered to be a large undertaking, i.e. meeting two of the following size requirements on a company basis: (i) balance sheet total of EUR 20 000 000 (ii) net turnover of EUR 40 000 000 (iii) own funds of EUR 2 000 000. |
| **Real-time Data** | Market data delivered with a delay of less than 15 minutes after publication. |
| **Recipient** | Any natural person, proprietorship, corporation, partnership, or other entity that has access to Nasdaq Information. |
| **Redistribution** | Providing a controlled or uncontrolled product. |
| **Snapshot** | Data Fees for per Individual Price Quote query. |
| **Subscriber** | General term for receiver of data for internal usage. |
| **System Description** | Shall mean the System Application, and any other description of Customer’s System given to, and approved by, Nasdaq. |
2. PRICING CLARIFICATIONS

OVERVIEW

The below clarifications are intended to clarify certain fees within each market. The policies below are in effect unless otherwise noted on the European Markets Data price list published on https://www.nasdaq.com/solutions/european-pricing-policies.

Other usage as excluded in Fee Exemptions Policy

Other employees of the Exchange Member and any employees of affiliates of the Exchange Member do not constitute internal users. Usage within the following areas is also excluded:

- Any non-employee usage
- For Market Makers which have signed a Market Maker agreement with the exchange, all non-display uses of Commodities Information received via OMNET API are not fee-liable when used in the market making operations.
- Non-employee order-routing
- Non-employee sponsored access/direct market access
- Any usage sourced from a vendor/Distributor Data Feed

### Nordic Equity Derivatives Members

Nordic Equity Derivatives Information is provided via ITCH. The connection used to access Nordic Equity Derivatives Information directly from Nasdaq will alter the fee liability associated with the receipt and distribution of Nordic Equity Derivatives Information. When reviewing the associated pricing, please also refer to the Member Rules and Regulations of Nasdaq Derivatives Markets.

- Nordic Derivatives ITCH is covered by the Member Rules and allows all Nordic Derivatives Members to receive and internally distribute the Nordic Equity Derivatives Information for “Internal Usage2 as defined by the Member Rules. As specified in the Member Rules all members need to sign a Global Data Agreement. Any and all other use of Derivatives Information sourced from ITCH and utilized outside of the Member Rules is fee-liable at the Nordic Equity Derivatives rates as provided in the price list.
- All Members that utilize Nordic Derivatives ITCH to connect to the Nordic Derivatives Exchange will be fee-liable at the underlying rate unless the Member is otherwise excluded per the criteria below:
  - Qualifying Market Makers (QMM) are Members that sign a qualifying market making agreement with the Nordic Derivatives Exchange. QMM are defined in chapter 2, section 2.7, of the Member Rules. All non-display of Derivatives Information received via ITCH are not fee-liable when used as part of market making operations. Also QMM are entitled to a reduced price on Nordic Equity non-display usage related only to their market making in Nasdaq Equity Derivatives instruments.
  - Liquidity Providers (LP) are Members that sign a liquidity provider form with the Nordic Derivatives Exchange. All non-display of Derivatives Information received via ITCH are not fee-liable when used specifically in liquidity providing operations and other usage as specifically excluded in the Exemptions Policy.
  - Qualifying Market Makers or Liquidity Providers that are only receiving Nordic Equity Derivatives Information from Nordic Derivatives Clearing Members, and from no other source, are not fee-liable for the internal use of Nordic Derivatives
Information when used as part of their Market Making or Liquidity Provider business, but the Clearing Member will be liable for the relevant external Distributor fees.

- Market Markers that have signed a non-qualifying market making agreement will not be fee exempt as described above.

Please note the following for clarification: All usage by a QMM or LP outside of their market-making or liquidity-providing operations, including all non-display usage, is fee-liable at the underlying product rates. This includes, but is not limited to, the following:

- External Distribution; or
- Trading on non-Market Making accounts, or specified LP accounts, or the Member Rules; or
- High frequency trading as defined by ESMA. “Trading activities that employ sophisticated, algorithmic technologies to interpret signals from the market and, in response, implement trading strategies that generally involve the high frequency generation of orders and a low latency transmission of these orders to the market”. Related Trading strategies mostly consist of either quasi market making or arbitraging within very short time horizons. They usually involve the execution of trades on own account (rather than for a recipient) and positions usually being closed out at the end of the day; or
- Pre-Trade Risk Management of Sponsored Access or Direct Market Access Order Flow; or
- LPs that do not meet the qualification criteria in the Liquidity Provider fee list for two consecutive months

Members of Nasdaq Derivatives Markets receiving Direct Access to Commodities order books though their derivatives membership will be able to use the commodities data as stated in the Member Rules and Regulation for the derivatives market for free. All other uses are fee-liable.
3. DERIVED DATA

POLICY OVERVIEW

Derived Data Distribution – New Original Works licenses gives the Customers the right to utilize real time data (pre- & post trade) to derive new original works based on multiple securities for unlimited distribution to controlled products provided the new original works cannot be reverse engineered in any way back to the underlying Nasdaq market data.

SINGLE SECURITY DERIVED DATA POLICY

Single security derived data for Equity-, Equity Derivatives- and Commodities- securities that contains price or quote data, and is based upon a single security symbol, and is created in whole or in part from Nasdaq Nordic and Baltic Information will generally be fee liable at the underlying product rates.

For example: displaying a price of a single Nasdaq Nordic equity security in real-time that is comprised with prices from other trading venues is not considered to be Derived data and is fee liable at underlying real-time subscriber product rates. Examples of single security data that are not considered to be Derived Data and are fee liable at the underlying product rates include (but are not limited to):

- Displaying the price of a security near or at the inside
- Equity curves
- Alert messages with prices
- Binary options data
- Indicative equity quotes
- Analytical or graphical representations with prices
- Alerts that meet preset criteria set by the Subscriber
- Contracts for Difference (CFD)
- Display of auto-quotes
- Price valuations for individual securities
- Spread transactions & Spread based derivative instruments
- Use of Nordic margin price data to create a derived data product

The use cases of single security Derived Data that will be considered as derived and not liable for the underlying product rates are:

- Certain Trading Platform publications: See below section: Trading Platform Derived Data Policy
- Derived Data used for Net Asset Value [NAV] calculations for funds listed on Nasdaq Nordic is not fee-liable
- Derived Data used for calculations for ETP/ETN and similar instrument types listed and traded exclusively on Nasdaq Nordic exchanges is not fee-liable
• Calculating Volume Weighted Average Price (“VWAP”) – where a Customers or SI takes Nordic data and uses volume and share price parameters to calculate VWAP – used to measure average price weighted by volume. From the VWAP value, it is not possible to reverse engineer the price, or the volume
• Signal creation - where a Customers uses data in real-time to create signals like buy/sell indicators, graphical representation of buy/sell indicators, charts and other non-price related graphical representations
• Internal usage of Nasdaq LBMA Derived Data is not fee-liaible with a Nasdaq LBMA enterprise license. Nasdaq LBMA derived data is not fee-liaible when distributed to controlled terminals of Nasdaq LBMA data, but where used outside a controlled terminal, it requires a separate Nasdaq LBMA enterprise license. For all other Nasdaq LBMA products derived data is not allowed
• An index future instrument derived from an index will follow index derived policy.

If your firm is unsure about a specific use case, please submit your use case to your Nasdaq Representative for a determination.

MULTIPLE SECURITY DERIVED DATA POLICY

Multiple security Derived Data that contains price data and is not based upon a single security symbol will generally not be fee liable at the underlying product rates, and Customers will be liable for the relevant Derived Data fee.

Examples include:
• Portfolio valuation: creation of the asset value of a portfolio of securities (multiple securities). Examples include, but are not limited to: Mutual Fund Valuations (NAVs), or Hedge Fund Valuations
• Creation of prices for certain products that contain multiple security information, such as derivatives based on combinations of multiple securities where the underlying single security price information cannot be reverse engineered

For Nordic Equity, Nordic Fixed Income, Nordic Equity Derivatives, Nasdaq Commodities and Baltic Equity and Fixed Income; Derived Data Fees do not include the right to create real-time indexes. If using the data to create real-time indexes, only the Index calculation fees would apply. If using for both Derived Data and indexes, then both fees would apply.

If your firm is unsure about a specific use case, please submit your use case to your Nasdaq Representative for a determination.

TRADING PLATFORM DERIVED DATA POLICY

A Trading Platform operator is liable for a fee if the data used is sourced from Nasdaq either directly or indirectly via a data vendor. If a trading platform receives data from multiple sources including Nasdaq, it is required to have entitlements, controls, and mechanisms to demonstrate how the data is utilized for pricing and quoting.
Examples of derived usage – note that this list is not exhaustive and does not limit what Nasdaq will consider to be fee liable at the underlying product rates or Trading Platform fee including display fees:

- Delaying a quote insignificantly is not considered to be Derived Data. All data delayed with less than 15 minutes is considered to be real-time data
- Altering the volume of a quote, but keeping the same price is not considered Derived Data, for example the Nasdaq volume is 100 shares but Trading Platform offers 10 shares
- Adding small amounts of decimals that marginally alter a quote is not considered to be Derived Data
- Random calculations that affect the quote marginally are not considered to be Derived Data
- Using a price of a single Equity-, Derivatives- or Commodities- security in real-time that is comprised with prices from other trading venues is not considered to be Derived data

**Non-Display usage:** When a Trading Platform uses Nasdaq market data for best execution checks, the Non-display Trading Platform License applies. If it is also used for order routing purposes, other applicable Non-display License apply.

- Derived Data used for Net Asset Value [NAV] calculations for funds listed on Nasdaq Nordic is not fee-liable.
- Customers are not permitted to use the Nordic Margin Price Data to create a Derived Data product.
- For Nordic Equity, Nordic Fixed Income, Nordic Equity Derivatives, and Commodities, Baltic; Derived Data Fees do not include the right to create indexes. If using the data to create indexes, only the Index fees would apply. If using for both Derived Data and indexes, then both fees would apply.
- Derived Data used for calculations for ETP instruments listed and traded exclusively on Nasdaq Nordic exchanges is not fee-liable.
- Any firm that receives a real-time Data Feed for derived data creation purpose only is at least required to pay the Internal Distributor fee for receipt of a real-time Data Feed.
4. NON-DISPLAY USAGE

OVERVIEW

Non-Display usage is any method of accessing Exchange Information other than Display Usage. Non-Display Usage is a means of accessing Nasdaq data that involves automated access or use by a machine, without access or use of a Display by a natural person or persons.

Devices used in the transportation, dissemination or aggregation (collectively, “distribution”) of data are not necessarily fee-liaible, but the Customer should be able to identify such Devices that exist within the market data infrastructure and how many Devices are used for distribution, separate and apart from Devices that are used for other purposes, as illustrated by the examples below. The Unit of Count for Non-Display products is per Customer.

NORDIC & BALTIC NON-DISPLAY

Categories applicable per asset class product:

- Category 1 Non-Display: Covers a firm’s non-display trading-based activities as trading firms and for the purpose of customer business facilitation. Includes: order routing, fully automated trading, and trading with manual intervention. (Also includes Category -2 usage outlined below)
- Category 2 Non-Display: Covers non-trading non-display activities for the purpose of calculation and verification such as but not limited to: portfolio valuation, administration, risk calculations, analysis, and fund management.
- Trading Platform: Customers operating a Trading Platform (including but not limited to: Multilateral Trading Facilities (MTF), Organized Trading Facilities (OTF), dark pools, broker crossing networks, systematic internalization systems, alternative trading systems, crossing networks are liable for the Trading Platform fee.

NORDIC & BALTIC NON-DISPLAY USE EXCLUSIONS

Non-Display does not include any use of Nasdaq Nordic or Baltic information that merely enables a display, and results in the output of Nasdaq Nordic information solely to a display. Examples include, but are not limited to:

- An application that is updating a portfolio and exposes such information on the display is not considered Non-Display
- Calculating VWAPs or other derived information for use in a Display is not considered Non-Display, however a derived license may apply

NORDIC EQUITY NON-DISPLAY
Nasdaq will review the percentage of data usage related to algorithmic trading to determine if the fee exemption per Nordic Member Rules and other relevant Non-display products will apply or not in January and July every year. This review will be based on June and December Nordic Equity Market share reports.

**NORDIC AND BALTIC FIXED INCOME NON-DISPLAY**

Non-display usage of Nordic Fixings is part of the Nordic Fixings Enterprise License fee and is not liable for the Nordic Fixed Income Non-display fee.

The Nordic Fixings Subscriber fee and the Nordic Fixed Income Subscriber fee do not include non-display usage of Nordic Fixings and are liable for the Nordic Fixed Income Non-display fee. All other Non-display usage of Nordic Fixed Income Data is fee liable regardless of the source of the market data.

**NORDIC EQUITY DERIVATIVES NON-DISPLAY**

All Nordic Equity Derivatives Non-display usage is fee liable. The only exception is for Market Makers and Liquidity providers as stated in the Nordic Derivatives Members section under Pricing Clarifications in this document.

**COMMODITIES NON-DISPLAY**

All commodities Non-display usage is fee liable, regardless of the source of the market data. The only exception is for Market Makers who have signed a market maker agreement as detailed in the Commodities Members section under Pricing Clarifications in this document.

**MANAGED DATA SOLUTION (MDS) NON-DISPLAY**

A customer subscribing to a Non-Display: Trading Activities product directly with Nasdaq and also a Non-display MDS product can be fee exempt for the Non-display product with the lowest price. This does not apply to Non-Display: Non-trading Activities products.

**OTHER NON-DISPLAY QUESTIONS**

If your firm is unsure about a specific use case, please submit your use case to your Nasdaq Representative for a determination at any time. For avoidance of doubt, Non-Display is fee liable regardless of whether the Order Management System, Execution Management System, or trading infrastructure is:

- A virtual system or located in the cloud;
• Installed locally within a data center;
• Enterprise; or
• Locally on an individual’s desktop or Device.

If your firm utilizes Nasdaq Information in accordance with the Non-Display clarification above, please contact Nasdaq.
5. DELAYED DATA

OVERVIEW

Nasdaq permits Customers to delay certain Information. In general, use of Nasdaq Nordic & Baltic Delayed data is free, however external distribution of eligible Delayed products where the data is distributed for a fee, including a general fee for accessing services, is fee liable. External distribution of Delayed data should be understood as the selling of Delayed data in unchanged form to third parties, either directly by charging when giving access to that data, or via a general access fee.

Where a Customer publishes Delayed data on a website, but does not directly charge for that access, it is not considered re-distribution and no re-distribution fee applies.

Where a Customer uses Delayed information in the creation of value-added services that are then re-distributed for a fee, fees will apply. Value-added services should be understood as the creation of a product made on the basis of Delayed data, for example through aggregating data sets across different sources or creating a historical series, or combining it with other information, and offering it as a product to third parties. Only those value-added services which are sold as a product for a fee to third parties should be considered as value-added services and will therefore be subject to a fee.

For Customers providing Delayed Information to Data Feed Recipients where the Delayed data is distributed as part of a commercial service; or value-added service, Nasdaq requires the Customer to sign a Global Data Agreement. Equally, if a Customer sources Nasdaq Delayed information from the Nasdaq website and externally distributes it as part of a commercial or value-added service, Nasdaq requires the Customer to sign a Global Data Agreement.

For Customers providing Delayed Information – regardless of whether the usage is fee liable- Nasdaq requires that an appropriate delay message be provided to Subscribers, including wall boards, tickers, mobile devices and audio announcements on voice response services. The delay message must prominently appear on all displays containing Delayed Data, such as at or near the top of the page. In the case of a ticker, the delay message should be interspersed with the market data at least every 90 seconds.

Examples of appropriate delayed messages are as follows:

• “Data Delayed 15 minutes”

• “Data Delayed 24 hours”

• “Del-15”, “Data Delayed until Midnight CET”
DELAY INTERVALS

The delay interval is a period of time after which Information becomes Delayed Information, as specified by Nasdaq. Please refer to the following page for the Delay Intervals for each data product. Some products are eligible for a Delay Interval, and after such time the data may be fee-liable or free, depending upon the product. Note that products that are listed as not eligible for a Delay Interval below will incur the relevant real-time fees.

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>Real-Time Information</td>
<td>Information disseminated prior to the Delay Interval.</td>
</tr>
<tr>
<td>Delayed Information</td>
<td>Information disseminated after the Delay Interval. Nasdaq currently recognizes the following delay intervals, which apply to individual products:</td>
</tr>
<tr>
<td></td>
<td>• 15 minutes</td>
</tr>
<tr>
<td></td>
<td>• 24 hours</td>
</tr>
<tr>
<td></td>
<td>• Midnight Local Time (local time 11:59:59 PM where the information is released)</td>
</tr>
<tr>
<td></td>
<td>• Not Eligible for Delayed Pricing</td>
</tr>
<tr>
<td></td>
<td>Note the Midnight Local Time refers to the time zone where the Information is originally distributed from Nasdaq.</td>
</tr>
<tr>
<td>End-of-day Information</td>
<td>Information from the current day that is disseminated after the market has closed for the current day and after the Delay Interval (unless otherwise noted).</td>
</tr>
</tbody>
</table>
A Customer may systematically delay certain information per the specified Delay Interval after which the distribution of the Information may not be fee-liable and may not need to be reported to Nasdaq on a monthly basis. Product specific information is provided below.

**PRODUCTS THAT CAN BE DELAYED BY 15 MINUTES**

Nasdaq permits Customers to delay certain components of the Information. Components of the Information that may be delayed are listed below. Internal usage of these products with no external distribution is not fee liable.

In general, external distribution of eligible delayed products where the data is distributed for a fee, including a general fee for accessing services, is fee liable. External distribution of Delayed data should be understood as the selling of Delayed data in unchanged form to third parties, either directly by charging when giving access to that data, or via a general access fee.

Where a Customer publishes Delayed data on a website, but does not directly charge for that access, it is not considered re-distribution and no re-distribution fee applies.
Where a Customer uses Delayed information in the creation of value-added services that are then re-distributed for a fee, fees will apply. Value-added services should be understood as the creation of a product made on the basis of Delayed data, for example through aggregating data sets across different sources or creating a historical series, or combining it with other information, and offering it as a product to third parties. Only those value-added services which are sold as a product for a fee to third parties should be considered as value-added services and will therefore be subject to a fee.

For the avoidance of doubt, the products that can be delayed by 15 minutes are:

<table>

**Nordic Fixed Income**

| Nordic Fixed Income | 15 Minutes | Five levels of market by price depth pre-trade data (price and volume), post-trade price data, instrument- and trading venue identifiers, MMT flags, execution- and publication- timestamps, trade types and price notations. For redistribution of delayed index data and Nasdaq-calculated statistics a Nordic Delayed Bundled Data Redistributor license is required. No Nasdaq-calculated analytics or calculated prices are eligible for delayed distribution. Please be advised that trade types “OTC-Loan Payment” and “OTC-Primary Transaction” are not considered transaction data and are not included in the delayed interval. |

Prior approval is required for Customers providing the above-mentioned delayed Information for a fee, including a general fee for accessing services, or for Distributors using the data in the creation of value-added services. Nasdaq requires the Customers to sign a Global Data Agreement and to report the total number of Delayed Data Recipients on a monthly basis.

**OBLIGATION TO MAKE MARKET DATA AVAILABLE FREE OF CHARGE 15 MINUTES AFTER PUBLICATION**

In compliance with Articles 64 and 65 of MiFID II and Article 13 of MiFIR, Nasdaq provides free and easily accessible access to Delayed data for regulated products on the Nasdaq website. Information on how to download the data can be found on the following page: [https://www.nasdaq.com/solutions/mifid-ii-delayed-data](https://www.nasdaq.com/solutions/mifid-ii-delayed-data). Post-trade files contain all the relevant fields for the purpose of post-trade transparency, including the relevant flags. Pre-trade data files include the current best bid and offer prices available, along with the depth of trading interest at those prices. Prior approval is required for Customers wishing to take data from the website and distribute it for a fee, including a general fee for accessing services. Prior approval is also required for Customers wishing to take the data from the website and use it in the creation of value-added services.
**PRODUCTS THAT CANNOT BE DELAYED BY 15 MINUTES**

The following products are not eligible for the delayed data policies, nor the obligation to make data available free of charge 15 minutes after publication. Delay eligibility can be found in column “Delay Interval” below:

Version 1.4.4
DATA FEED AGREEMENTS: END-OF-DAY DATA FEEDS

Customers that provide End-of-Day Information, held until after the Delay Interval, if applicable, on an Uncontrolled Product are not currently required to obtain a Nasdaq Global Data Agreement from such Data Feed Recipients. Nasdaq's waiver of the agreement requirements does not limit the Customer’s indemnification obligations as per the Nasdaq Global Data Agreement.

PRODUCT SPECIFIC NOTES:

<table>

</thead>
<tbody>
<tr>
<td>Baltic Equity &amp; Fixed Income</td>
<td>The Midnight (Local Time) Delay Interval applies only to External distribution of Baltic End-of-Day reports received from Nasdaq and distributed in their entirety; partial extracts of such Baltic End-of-Day reports may be distributed prior to midnight Local Time free of charge; Baltic End-of-Day reports may be created by the Customers from underlying data sets and distributed prior to the corresponding Delay Interval free of charge.</td>
</tr>
<tr>
<td>Nordic Fixed Income</td>
<td>The only components of the Nordic Fixed Income product that are eligible for delayed distribution are the intraday pre- &amp; post trade data.</td>
</tr>
</tbody>
</table>
6. DISTRIBUTOR FEES

NASDAQ NORDIC, BALTIC & COMMODITIES HISTORICAL DATA

The Subscriber has the right to save Nordic and Baltic Historical Data on their own computer, to process it, and to employ it for internal use only. The Subscriber is not permitted to forward the Nasdaq Market by Level Nordic and Baltic Historical Data with more than five levels of market by price depth pre-trade data and trades to third parties, or to display it on public access media such as the Internet.

The Midnight (Local Time) Delay Interval applies only to External distribution of Baltic End-of-Day reports received from Nasdaq and distributed in their entirety; partial extracts of such Baltic End-of-Day reports may be distributed prior to midnight local time free of charge; Baltic End-of-Day reports may be created by the Customer from underlying data sets and distributed prior to the corresponding Delay Interval free of charge.

7. NATURAL USER POLICY

OVERVIEW

Reporting of Natural Users (“netting”) is available to Customers who have met the criteria and have been formally approved in writing by Nasdaq. Reporting of Natural Users allows approved Customers to:

- Directly Report all Display Subscribers regardless of the source of the data;
- Adopt a User based Unit of Count for Display Usage reporting and subsequent payment of fees to Nasdaq

Unit of Count for Natural Users can be reported to Nasdaq for Customer’s internal Display Usage, for the following Subscriber products:

<table>
<thead>
<tr>
<th>Products:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Nordic Equity</td>
</tr>
<tr>
<td>Nordic Fixed Income</td>
</tr>
</tbody>
</table>
NATURAL USER CRITERIA

The below acceptance criteria must be met and maintained by a Customer that reports Natural Users:

- Executed the Global Data Agreement
- Complete the Nasdaq European Natural User Request Form (as provided by Nasdaq Data Operations)
- Agree to direct billing by Nasdaq for all Nasdaq products listed above (for which the Customer have access). Billing will apply across the Customer’s entire organization, including affiliates. Nasdaq will bill for all services on one billing account. If separate billing accounts are requested, Customer will be required to pay multiple distributor fees across each billing account.
- Customers must demonstrate adequate internal controls for entitlements and monitoring, and controls for the reporting of all vendor-reported Display Use as well as any internal Display Use.
- Customers must submit the Natural User Reporting file in the required format starting from the month approved by Nasdaq (and ongoing). Amendments or edits to the Natural User Reporting file format are prohibited. In cases where participants amend or edit the file format, they will be billed for all Subscribers (e.g. Not for Natural Users).

ACCEPTANCE FOR REPORTING NATURAL USERS

- After meeting the above acceptance criteria, Nasdaq will provide the Customer with an approval letter confirming their acceptance to report Natural Users. The start date will always be at the commencement of a calendar quarter (mutually agreed upon) and communicated in the approval letter.
- An approval letter will be issued by Nasdaq to the vendors that provide data to the Customer at the time of acceptance in to reporting Natural Users. Customer must notify Nasdaq of any new vendors such that Nasdaq may inform them. In most cases, vendors require Nasdaq to provide 90 days’ notice and as such, the effective date for billing will only commence once each vendor reports Customer’s usage as non-billable.
OBLIGATIONS FOR CUSTOMER REPORTING NATURAL USERS

- Customers are required to submit the Natural User Reporting File report to Nasdaq monthly. The report is due the 15th day of the month following the service month. The report will be rejected if it is not submitted in the required format for Natural User Reporting Files.

- Customers must report the number of Natural Users via the Natural User Reporting File and the Nasdaq Reporting Application (NORA link) by using one Nasdaq billing account number as stated in the file. Nasdaq will issue only one monthly invoice to Customers. All Customers reporting Natural Users shall continue to comply with all other terms and conditions as published in European Data Policies.

- The reporting start date is the first day in the service month in which the product or service is capable of being accessed by a User. Customers will start reporting the number of Display Subscribers before the 15th of the month following the service month. Subscribers of a Customer that report relevant Natural Users that are billed by a Vendor should be excluded from the count of Subscribers reported to Nasdaq via NORA. Customers reporting Natural Users should work with Vendors to move those Subscribers to non-billable codes.

- Customers reporting Natural User(s) must maintain payment of all other fees, including applicable fees for their Customer category. Customers reporting Natural User(s) for Nordic Equity, Nordic Fixed Income, Nordic Equity Derivatives, Nasdaq Commodities and Baltic Equity & Fixed Income products will pay the Professional per Natural User, Pre-trade Data Natural User and Post-trade Data Natural User fees as applicable for their Professional Display Usage. Customers reporting Natural User(s) for their Commodities MDS Display with Non-Display Access will pay the Natural User fees.

- Customers reporting Natural User(s) must keep adequate records to demonstrate that the particular unit should be considered to be a Natural User.

- Customers reporting Natural User(s) must include contact information for all contracting parties, such as vendors.

BILLABLE AND NON-BILLABLE GUIDELINE FOR NATURAL USERS

- Customers are to report all Billable and Non-Billable Subscribers and associated instances in the European Natural Users Reporting File as Billable Users.

- Systems may be in the European Natural Users Reporting File, but should be reported as Non-Billable.

VENDOR REPORTING OF NATURAL USERS

Vendors for the purposes of this document shall refer to Distributors of Nasdaq Information that have executed a Global Data Agreement (GDA) with Nasdaq. Vendors are also known as market data Vendors.

- Customers Display Usage through a Vendor shall be covered only to the extent Nasdaq has informed the Vendor of Natural Users (see section on Acceptance).

- Vendor shall then be instructed by Customers to report all Subscribers receiving Information that qualifies as Natural Users to Nasdaq under a non-billable code.
Vendor-reported Display Usage submitted on behalf of Customers must continue to abide by the Nasdaq Requirements, including the submission of both Summary and Detailed usage reporting to Nasdaq on a monthly basis (see Nasdaq Reporting Policy document). Vendors that fail to provide Nasdaq the associated reporting for a Customer may be reason for Nasdaq to decline the Natural User Reporting File.

**TERMINATION OF NATURAL USER REPORTING**

- In case of termination of reporting of Natural Users Customers are required to notify Nasdaq in writing at least ninety (90) days prior, with expiry effective at the end of a calendar quarter. Additionally, Customers that report Natural Users must notify their vendors to begin billing and reporting them for all European Information. Confirmation of these requirements must be shared in writing to Nasdaq prior to the Customer stopping reporting of Natural Users. Nasdaq will bill the applicable Subscriber usage directly to Customer until vendor reporting is updated. Nasdaq may deny reporting of Natural Users if the Customer fails to provide a timely Natural User Reporting File each month.

- Upon termination of reporting of Natural users by the Customer, the Customers must provide Nasdaq with a comprehensive list of Vendor reported Subscribers that were reported as non-billable on their behalf. Additionally, Customers that report Natural Users shall provide each such vendor with a written notification indicating the end date of the Program; such notice must also be sent to Nasdaq.

**AUDIT**

Nasdaq has the right to examine the books and records of Customers reporting Natural Users. Adequate record keeping and controls must be in place to be admitted to report Natural Users. Customers are liable for any underreported usage, or usage that is not captured during the Recipients netting process. Nasdaq has the right to inspect the process and systems for reporting Natural Users prior to the acceptance from Nasdaq to report Natural Users.

**OTHER NOTES ON REPORTING OF NATURAL USERS**

NOTE 1: Non-Display usage is not covered under this policy except for the Natural User fees for Commodities MDS Display with Non-Display Access.

NOTE 2: Nordic and Baltic member firms that report Natural Users who have Users currently reported as non-fee liable per the Trading Cycle must report these users as Billable in order to report Natural Users.
# 8. UNIT OF COUNT TERMINOLOGY

## OVERVIEW

Except where specifically detailed otherwise in this policy document, distribution of Nasdaq Information is to be measured, controlled and recorded by using the Interrogation Device or Subscriber as the Unit of Count.

<table>
<thead>
<tr>
<th>Terminology</th>
<th>Definition</th>
<th>Unit of Count</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subscriber also referred to as</td>
<td>A device, computer terminal, automated service, or unique user identification and password combination that is not shared and prohibits simultaneous access, and which is capable of accessing Nasdaq Information; “Interrogation Device,” “Device” or “Access” have the same meaning as Subscriber. For any device, computer terminal, automated service, or unique user identification and password combination that is shared or allows simultaneous access, Subscriber shall mean the number of such simultaneous accesses</td>
<td>The Number of physical Devices or the Number of Unique User IDs and Password combinations that are not shared by multiple people, and cannot simultaneously log-on with multiple instances or to multiple Devices Customers are to report the total number of Subscribers with the potential to access the Information, unless the Customer is able to technically track actual usage for each Subscriber</td>
</tr>
<tr>
<td>Per Query</td>
<td>Retrieval by a Subscriber of Nasdaq Information that is updated by an action on the part of the Subscriber; each unrequested or pushed update of price(s) or quote(s) must be recorded (see Pricing clarifications above for additional details)</td>
<td>Any displayed quote requested or pushed</td>
</tr>
<tr>
<td>Data Feed</td>
<td>Any uncontrolled transmission of Nasdaq Information in which the Customer does not control both the entitlements and the display of the Information</td>
<td>The number of Data Feed Recipients</td>
</tr>
<tr>
<td>User</td>
<td>A natural person that receives Exchange Information</td>
<td>Each natural person</td>
</tr>
<tr>
<td><strong>Website</strong></td>
<td>One or more public internet uniform resource locators (URL) with a single commercial brand or identity</td>
<td>Each unique Website with access to Nasdaq Information. Nasdaq reserves the right to determine whether any URL or group of URLs should be regarded as separate Websites for fee purposes</td>
</tr>
<tr>
<td><strong>Unique Devices or Per Device</strong></td>
<td>The number of unique Devices accessing a website or mobile application. Customers restricting access to the Customer’s service may not report on a “per Device” basis; they must select either “per user” or “per query”. Access restriction refers to restrictions on content, not simply a username and password requirement (please speak with your Nasdaq representative for additional detail)</td>
<td>The number of “Unique Devices” (Reporting methodologies in counting Devices must be approved in advance by Nasdaq)</td>
</tr>
<tr>
<td><strong>Display Usage</strong></td>
<td>Any method of accessing Exchange Information that involves the display of such data on a screen or other mechanism designed for access or use by a natural person or persons</td>
<td></td>
</tr>
<tr>
<td><strong>Custody Account</strong></td>
<td>Number of accounts that the Member has that are available for trading or viewing</td>
<td>“Per Custody Account” pricing requires the Customer to report each Subscriber with an active custody account with the Member</td>
</tr>
<tr>
<td><strong>Active Subscriber</strong></td>
<td>Custody Accounts accessed each month by a Subscriber</td>
<td>Customers are to report snapshot Subscribers that access the Custody Account of the Member’s Service within a particular calendar month</td>
</tr>
<tr>
<td><strong>Subscriber Firm</strong></td>
<td>The total number of firms with Non-Professional Subscribers plus the number of firms with Professional Subscribers accessing the Information</td>
<td>The number of Subscriber Firms</td>
</tr>
<tr>
<td><strong>Natural User</strong></td>
<td>A User with one or more Access IDs with one or more Information Suppliers.</td>
<td>Each User with one or more Access/User ID.</td>
</tr>
</tbody>
</table>
Customers are to report the total number of Natural Users.

Natural User fees will apply to all Internal Use of the Customer.

Where a Device cannot be allocated to a natural person, each natural person with potential access must be reported; or per Subscriber reporting is required.

9. UNIT OF COUNT: SYSTEM CLASSIFICATIONS

OVERVIEW

The Unit of Count may differ, depending upon the information received and the method of distribution. Please use the below guidelines for submitting Units of Count, Reportable Units or similar to Nasdaq. All Units of Count used by a Customer or a Customer’s Group must be identified in the Nasdaq System Application. Customers are entitled to freely select the unit of count according to their preference among the options offered by Nasdaq. Nasdaq recognizes the following types of System Types or Applications.

UNIT OF COUNT: UNCONTROLLED PRODUCTS

An Uncontrolled Product is defined by Nasdaq as any uncontrolled distribution of Nasdaq Information to Subscribers. If the Customer cannot control both the entitlements and the display of the Information, then the system will be considered an Uncontrolled Product.

NASDAQ CURRENTLY OFFERS THE FOLLOWING UNCONTROLLED PRODUCTS FOR EUROPEAN MARKETS:

- UP1. Data Feed
- UP2. Nordic & Baltic Managed Data Solutions [MDS]

UNIT OF COUNT: CONTROLLED PRODUCTS

A Controlled Product is defined by Nasdaq as any controlled distribution of Nasdaq Information to Subscribers. If the Customer controls both the entitlements and the display of the Information, then the system will be considered a Controlled Product.
NASDAQ CURRENTLY OFFERS THE FOLLOWING CONTROLLED PRODUCTS:

- CP1. Subscriber [Controlled Device/Access]
- CP2. Hosted Solution: Select Nordic & Baltic Data

THE UNCONTROLLED AND CONTROLLED PRODUCTS ARE DESCRIBED IN THE FOLLOWING SECTIONS

A. **UP1. DATA FEED**

<table>
<thead>
<tr>
<th>Data Product</th>
<th>Type Offered</th>
</tr>
</thead>
<tbody>
<tr>
<td>All Nasdaq Information</td>
<td>Display or Non-Display</td>
</tr>
</tbody>
</table>

A Data feed is defined by Nasdaq as any uncontrolled distribution of Nasdaq Information. Any firm receiving a Data feed (Recipient) is recognized as a Customer by Nasdaq.

All Data Feeds — including internally or externally distributed, real-time or delayed, snapshot or streaming, Direct or Indirect — must be approved by Nasdaq prior to initiation of service. This approval process creates a direct relationship between the Recipient and Nasdaq. This direct relationship is essential to ensuring the correct display of the information, an effective entitlement process and a timely reporting process of the market data usage. After Customers are granted permission to provide Data feeds, each individual Recipient of a Data feed must be approved as well. If a Distributor provides data to an unapproved Recipient or releases information prior to approval, the Customers is responsible for paying the Recipient’s fees and charges associated with this data during the unauthorized timeframe.

EXCEPTIONS: NORDIC & BALTIC DELAYED DATA FEED: See the Delayed Data section of this document for further details.
B. **UP2. NORDIC & BALTIC MANAGED DATA SOLUTIONS [MDS]**

<table>
<thead>

</tr>
<tr>
<td>NASDAQ COMMODITIES</td>
<td>Non-Professional: Display</td>
</tr>
<tr>
<td>BALTIC EQUITY &amp; FIXED INCOME</td>
<td></td>
</tr>
</tbody>
</table>

**OVERVIEW**

Distribution of a Nasdaq Nordic- or Baltic real time market data product for Subscriber or Data Feed Recipient usage in internal applications, servers, or similar services where the Distributor controls the entitlement.

Customers offering Managed Data Solutions must:

- Seek approval from Nasdaq that they may offer Managed Data Solutions
- Report Managed Data Solution Recipients using the Online Reporting System for Summary and detailed Usage Reporting
- Report Managed Data Solution Recipients using data in display and/or non-display Devices
- If Non-Display usage is approved fee-waived by Nasdaq for a Managed Data Solution Recipient, this usage should be reported using a non-billable reporting code
- Offer an integrated data solution with secured data transmissions and data usage monitoring capabilities
- Assume the liability for any unauthorized use of Nasdaq Information by Managed Data Solution Recipients
C. CP1. SUBSCRIBER: CONTROLLED DEVICE/ACCESS/USER

<table>
<thead>
<tr>
<th>Data Product</th>
<th>Type Offered</th>
</tr>
</thead>
<tbody>
<tr>
<td>All Nasdaq Information</td>
<td>Display</td>
</tr>
</tbody>
</table>

OVERVIEW

A Controlled Device/Access is a type of Controlled Product that contains Nasdaq information that is offered by a Distributor where the Distributor controls both the entitlements and the display of the information. Nasdaq allows Distributors to report such Controlled Products to Nasdaq as Subscribers.

D. CP2. HOSTED DISPLAY SOLUTION

<table>

<td>Display Only</td>
</tr>
<tr>
<td>Commodities Level 2, Delayed</td>
<td></td>
</tr>
<tr>
<td>Nordic Fixed Income, Delayed</td>
<td></td>
</tr>
</tbody>
</table>

OVERVIEW

A Hosted Display Solution is a product, solution or capability provided by a Distributor in which the Distributor makes Nasdaq information available to an application branded or co-branded with a third-party brand for use by external Subscribers of the third-party entity or Distributor. The Distributor maintains control of the data, entitlements and display of the product, solution or capability. The Hosted Display Solution may take a number of forms. Examples include, but not limited to:

- “Widget,” such as an iframe or applet, in which the Hosted Display Solution is a part or a subset of a website or platform.
• “White Label,” in which the Distributor hosts or maintains the website or platform on behalf of a third party entity.

E. UNIT OF COUNT: COUNTING GUIDELINES

SIMULTANEOUS ACCESS

Simultaneous access by Unique User ID is prohibited, unless the Customer is able to record, track and report the number of users able to simultaneously access Nasdaq Information. (See pricing clarifications for additional details)

CONTENDED ACCESS

Contended access refers to a service in which multiple Subscribers or Devices access information through a limited number of access sessions. The number of contended access sessions may be smaller than the number of Subscribers or Devices with access capability. Please note that Nasdaq does not consider a contended access session to be equivalent to a Subscriber or an Interrogation Device. In contended access situations, the Customer must base usage reporting on the number of Subscribers, Interrogation Devices, or Users capable of accessing the Information, not the number of potential simultaneous sessions.
