1) A monthly subscription to access the daily ITCH Log files via FDS, with 30 days of history continuously available. The price is per asset class. The data is for internal use only.

2) A fee per asset class per calendar month of historical ITCH log files ordered via Nasdaq. The data is for internal use only.

3) For Redistribution of historical orders- and trades data. The data is for internal use by the end-customer only. Distributor to report number of receiving firms and number of months delivered.

4) For Redistribution of historical orders- and trades data. The data is for internal use only for the end-customer receiving the data from the distributor. Distributor to report number of receiving firms.

5) A fee per historical calendar month of historical closing price, high price, low price, cumulative order book turnover in units and local currency. The data is available in flat format and delivered via FTP or email depending on size of data set ordered.

## NORDIC DELAYED BUNDLED

The Nordic Delayed External Distributor Bundled license gives the right to redistribute delayed Nordic Equity-, Equity Derivatives, Fixed Income and Commodities data with up to five levels of market by price depth pre-trade data (price and volume), post-trade data, instrument and trading venue identifiers, MMT flags, execution and publication timestamps, trade types and price notation. It also gives the right to externally distribute trade statistics data as calculated by Nasdaq. Nordic index values and constituents are included with the Nordic Delayed External Distributor Bundled license. For further information on delayed data please see the Policy.

Nordic Delayed Data External Distributor Bundled	
Service Level	Fee/Month
Nordic Delayed External Distributor Bundled	Number of Delayed Data Recipients:
	1: € 1,167
	2-5: € 2,210
	6-25: € 8,018
	26-100: € 17,270
	101+: € 67,128

The Baltic Delayed External Distributor Bundled license gives the right to redistribute delayed Baltic Equity and Fixed Income data with up to five levels of market by price depth pre-trade data (price and volume), post-trade data, instrument- and trading venue identifiers, MMT flags, execution- and publication- timestamps, trade types and price notation. It also gives the right to externally distribute trade statistics data as calculated by Nasdaq. Baltic index values and constituents are included with Baltic Delayed External Distributor Bundled license. For further information on delayed data please see the Policy.

Baltic Delayed Data External Distributor Bundled	
Service Level	Fee/Month
Baltic Delayed External Distributor Bundled	Number of Delayed Data Recipients:
	1: € 642
	2-5: € 1,748
	6-15: € 3,804
	16+: € 11,514

## NORDIC ANALYTICS

Nordic Fixed Income Bond Analytics	
Service level	Fee/Month
Nordic Fixed Income Bond Analytics License- Enterprise <sup>1</sup>	€ 1.100
Nordic Fixed Income Bond analytics including Fair value intraday - Enterprise <sup>1</sup>	€ 1.408
Nordic Fixed Income Bond analytics including Fair value intraday - Hosted <sup>1</sup>	€ 1.408

1) Includes unlimited use of the Bond Analytics data in internal applications. This unlimited usage includes display use, the creation of derived data and Non-Display use in internal applications. Bond Analytics is not eligible for the Delayed intervals.

Nordic Equity Analytics		
Service level	Per subscriber	Fee/Month
Order Coverage	€ 10	Order book coverage displays the percentage of the time that both a bid and ask existed in the given order book. The message is disseminated every hour.
Implicit Cost	€ 10	The implicit costs of trading in at a given time in a period. Implicit spread cost can be used to analyze a defined time period for an order book for patterns where it is expected to be most beneficial to trade.
Depth in Orderbook	€ 10	Order/and price statistics measured in number of orders/volume and value.
Price Quotations Indicators	€ 10	Development in both the average best time-weighted quoted Bid (TWAB Bid), Ask (TWAB Ask) and best bid and ask volume weighted Mid-quotes (TVWAQ) in the orderbook. Can for instance be used to trace volatility in prices.
Round trip cost	€ 10	Round trip cost estimates the cost of trading for a pre-defined value as a function of the liquidity class and existing visible order book liquidity. It also provides the proportion of the time period that a given value class can be fully filled, expressed as a percentage. The message is disseminated every hour.

The indicators can be used for different purposes. For example, to either show the spread or depth there has been in a given period; how much competition in average there has been; and how the competition has been distributed across the buy and sell-side of a given quoted orderbook.

Available for Nordic Equity and related instruments. Nordic Equity Analytics data is included in Nordic Equity TotalView Subscriber fees.

A complement to the Nasdaq-ITCH Real-time Data Feed products, Nasdaq GLIMPSE™ is a point-to-point Data Feed connection that provides direct Data Feed Customers with the current state of the Nasdaq execution system with full market participant attribution. Nasdaq GLIMPSE™ uses the same data formats as the TotalView-ITCH Data Feed product. GLIMPSE is a technical license that relates to an ITCH Data Feed and does not include any data content. Connectivity cost for ports are additional to the GLIMPSE Service fee. Please find technical price list here:

<https://www.nasdaq.com/solutions/european-market-connectivity>

Nordic Web API		
Service level	Connection fee/ Month	Description
Nordic Equity Web API – Access fee	€ 1.260	Web API access to Nasdaq Nordic Equity data.
Nordic Index Web API – Access fee	€ 600	Web API access to Nasdaq index data.
Nordic Equity Derivatives Web API – Access fee	€ 1.260	Web API access to Nasdaq Nordic Equity Derivatives data.
Commodities Web API – Access fee	€ 1.050	Web API access to delayed Nasdaq Commodities data.

The Nasdaq Nordic Web API (**WAPI**) is an easy to implement data solution that supplies Real-Time or End-of-Day data prices through a secure website to, for example, web sites or custom market data applications.

WAPI is a service that eliminates the need for coding and connectivity towards other protocols and feed solutions (i.e. TIP, ITCH).

- WAPI can be accessed through HTTP or HTTPS.
- XML, JSON or JSONP formatted data
- WAPI supports REST
- WAPI supports quote, orderbook, trades and historical data requests

Display or non-display usage fees apply and are supplemental to the WAPI fees outlined above.

## DOCUMENT UPDATES

Document updates provide insight into changes of data policies. Major price or policy updates will be identified by a new release. Minor updates will be identified by version (e.g., X.1).
