

## Limited Assurance for 2024 GHG Metrics For Nasdaq

June 20, 2025

KERAMIDA Inc. (KERAMIDA) was engaged by Nasdaq, Inc. (Nasdaq) to provide limited assurance greenhouse gas (GHG) verification of their 2024 Scope 1, 2 and 3 Category 1, 2, 3, 5, 6, 7, 8, 13, 15 GHG emissions inventory. The data and calculations being verified cover the period of January 1, 2024, to December 31, 2024. KERAMIDA is an accredited solution provider to CDP and this Project was managed by a Lead GHG Verifier (license H-24-208).

### **Statement of Independence**

KERAMIDA affirms our independence from Nasdaq and is free from bias and conflicts of interest related to the assurance of the environmental data.

### **Verification Assurance Opinion**

Based on the process and procedures conducted, there is no evidence that the verified GHG emissions calculations and summaries are not a fair representation of the actual GHG emissions data and information.

Nasdaq has established an appropriate system for collecting, calculating, and analyzing quantitative data and information for the GHG emissions for the stated time period, scope and level of assurance. An opinion of limited assurance was concluded based off KERAMIDA's verification.

### **KERAMIDA's Approach**

Verification was conducted in accordance with ISO 14064-3: 2019 *Specification with guidance for the validation and verification of greenhouse gas assertion*, which is an approved verification standard accepted by the Carbon Disclosure Project (CDP). The scope of work was to provide limited assurance for the verification of their GHG emissions inventory and energy use data, and verification was led by an accredited California Lead GHG Verifier.

**KERAMIDA's Methodology and Procedure***Procedure performed during the verification*

- Interviews with key personnel involved in the process of data collection, compiling, calculating, and preparing the emissions data report. All meetings were conducted virtually;
- Assessed the data management systems and protocols by:
  - Understanding the selection process for data to be used and reported;
  - Conducting assurance procedures to assess the accuracy of data collected and reported; and
  - Understanding the calculation approach and methods.
- Review of a variety of data analytics to check the reasonableness of the data and calculations;
- A variety of re-calculation procedures to confirm stated quantities;
- Evaluated the reasonableness of any assumptions used in support of disclosures;
- Reviewed how disclosures were presented and determine if they were representative of data and operations.
