Nasdaq Express Connect

Nasdaq Express Connect is a low latency point-to-point network solution offering connectivity between the Nasdaq Data Center located in Vasby and other data centers. By partnering with leading telecommunications providers, Nasdaq can provide low communications latency through a secure and competitively-priced network. All customers receive a guaranteed Service Level Agreement (SLA) and future latency improvement as routes and technology improve during the course of the contract.

**BENEFITS**

- Low Cost, High Bandwidth Connections
- Fast Turn-Up Times
- Trusted Telecommunications Providers
- Low Latency Available For Primary Or Redundant Integral Routes
- Short Term Contracts

**CUTTING-EDGE TECHNOLOGY**

Express Connect network technology delivers dedicated bandwidth for point-to-point configurations that are effective in high-bandwidth, extreme performance and low latency scenarios, particularly trading and market data delivery.

The 1G service is based on Ethernet over Dense Wavelength Division Multiplexing (EoDWDM) technology, providing the lowest latency solution next to dark fiber. Customers simply select from the options below and we provide the service and associated latency-based SLAs aligned to the path chosen. Turnaround time is estimated to be within 10 business days.
**LATENCY**

Roundtrip latency numbers within the SLAs are limited to Section 2 of the illustration below. The estimated latency of Section 2 below includes all equipment from the carrier demark within the data center facility to the carrier demark at the other data center.

**PATHS**

Paths are provided non-redundant connections.

<table>
<thead>
<tr>
<th>A Side</th>
<th>B Side</th>
<th>Carrier</th>
<th>Bandwidth</th>
<th>Route</th>
<th>RTT Latency</th>
</tr>
</thead>
<tbody>
<tr>
<td>Nasdaq Vasby</td>
<td>Nasdaq Port</td>
<td>Nasdaq</td>
<td>1G</td>
<td>Primary</td>
<td>480µs</td>
</tr>
</tbody>
</table>

More paths will be added in the near future.

Existing co-location customers may place orders using the CoLo and Connectivity Console. Please refer to the Co-location and Connectivity price list for prices.
